

Jordan Smith

Field Service Engineer | Industrial Automation, Gas Detection & Electrical Systems
East Orange, NJ 07017 · (862) 944-6540 · tobi657@outlook.com

EDUCATION

Lincoln Technical Institute, Union, NJ

Graduated October 2019

- Diploma in Electrical & Electronic Technologies

East Orange Campus High School, East Orange, NJ

Graduated June 2018

- High School Diploma

PROFESSIONAL EXPERIENCE

Honeywell, Northeast & Southeast USA

December 2023 – August 2025

Field Service Engineer

- Calibrated and maintained fixed and portable gas detection systems in semiconductor fabrication and petrochemical environments, including Raytheon and Analog Devices facilities
- Diagnosed and resolved faults in wired and standalone detectors using mA signaling to ensure accurate alarm and fault reporting
- Analyzed and serviced vacuum systems and air sampling lines to maintain operational performance within required ranges
- Applied gas substitution techniques to improve calibration accuracy and detection reliability
- Increased system reliability by approximately 15% through calibration, fault isolation, and preventive maintenance

JLL - Amazon Sort Center, Teterboro, NJ

November 2021 – August 2023

Maintenance Technician

- Maintained chain-driven, pneumatic, and belt-driven conveyor systems to support continuous warehouse operations
- Troubleshoot photo eye sensors and conveyor control failures, minimizing downtime during peak production periods
- Serviced drive motors through alignment, oiling, rebuilding, and component replacement to extend equipment lifespan
- Diagnosed electrical and mechanical issues involving VFDs and Allen-Bradley PLCs to restore system performance
- Implemented preventive maintenance procedures that reduced conveyor breakdowns by approximately 15%

New Jersey Transit, Hoboken, NJ

January 2021 – September 2021

Electrician

- Performed pre-operation electrical inspections on locomotives, including 600V power systems, low-voltage controls, and lighting circuits
- Maintained and replaced 90V acid-type backup battery systems according to strict safety and reliability standards
- Verified functionality of electronic safety systems such as automatic braking and event recorders to meet federal compliance requirements
- Improved inspection efficiency while maintaining safety integrity, reducing pre-check turnaround times

Prince Telecom (Comcast), Statewide, NJ

June 2020 – October 2020

Cable Technician

- Installed and configured residential cable and internet services, ensuring reliable signal quality and customer satisfaction
- Routed and terminated coaxial cables from aerial and underground sources in compliance with technical specifications
- Diagnosed and resolved connectivity issues, achieving a first-visit resolution rate of approximately 95%
